MEMORANDUM FOR: Deputy Director of Central Intelligence

FROM : S. D. Breckinridge
Deputy Inspector General

SUBJECT : Progress on Research on SSC Final
Report

1. At present we estimate that the basic research on this matter will be completed by the end of November. This will have covered some 60 boxes of files on Cuban operations, some three safe drawers of material in the Office of Security, and the CI Staff files reflecting work with the Warren Commission and relating to Lee Harvey Oswald.

2. There has been some preliminary consideration of issues to be addressed in a final paper that will summarize the results of the research and comment on Volume V of the SSC final report (by the Schweiker subcommittee).

3. Progress over the next week or two will be incremental rather than varying the above summary. We will be addressing the question of the report, but the final outline and the extent of the discussion must wait an evaluation of the work being done on LA Division files by a team of researchers. Progress on this will be reported to you.

S. D. Breckinridge
